## SUMMARY

---

React Native/ React JS Developer having 1 year of experience and have worked on many projects in college, participated in hackathons , good at problem solving and I love to swim in errors until I get out of them.

## WORK EXPERIENCE

---

### Full-Stack Web Developer

July 2022 - July 2023

Worked as Full-Stack web developer at MAI (Manifesto AI), got familiar with React development environment, also learnt about Express JS, Mongoddb, Cors, and became proficient in NodeJS environment at the back-end, built mobile, tab and web responsive designs, built the web pages according to the provided Figma designs.

## PROJECTS

---

### Task-Taking Android Application (Watermelon DB)

[Git Repo](#)

Built Task Management app using React Native, the app prioritizes tasks dynamically by organizing tasks based on priority, opted Watermelon DB to store data which uses lazy loading for better performance .

### Coffee Shop Application (React Native)

[Git Repo](#)

Developed coffee shop app, using top-notch technologies such as Zustand for seamless data management and Immer for efficient object updates. Leveraging React Native Async Storage ensured smooth local data handling, while React Navigation streamlined user navigation. Additionally, I enhanced the app's visual appeal with components like React Native Linear Gradient and Lottie React Native. This project showcased my ability to integrate diverse dependencies for a polished user experience.

### Betting Application (ReactJS)

[Git Repo](#)

Built a simple React JS application for a client who wanted to generate a random number array from a set of predefined array and also they wanted to copy the generated text in a particular format

## EDUCATION

---

2021 - 2024 (present)	Bachelor's Degree in CSE at <b>DY PATIL UNIVERSITY</b>	
2017 - 2021	Diploma in Mechanical Eng. at <b>MIT WPU, Pune</b>	(86 %)
2017	Class 10th SSC Board	(79 %)

## PUBLICATIONS

---

### Hashnode [Blog Link](#)

Hashnode is a free developer blogging platform that allows you to publish articles on your own domain and helps you stay connected with a global developer community, I publish the solutions I particularly struggled with while working on my projects so that my fellow developer community won't face the same issues or if faced ! they have their brother at their help

## SKILLS

---

Technical Skills	React JS, React Native, JavaScript, NodeJS, MongoDB, ExpressJS
Linux	Linux Mint(Cinnamon Edition) is my Current OS. Previoulsy Used Distros:- Kali linux, Fedora OS, Debian, Pop OS
